

1. (Amended) A system for targeting content to network devices over a data network, comprising:
- a profile store that stores user profile information for network devices;
  - a content store for storing content; and
  - a system manager for downloading content from the content store to targeted network devices based on user profile information for the network devices and group profile information to which the content is targeted, the system manager sending messages to the targeted network devices among other network devices on the data network instructing system agents on the targeted network devices on when and which content to download.

10. (Amended) A method for targeting content to network devices over a data network, comprising:
- storing user profile information for network devices;
  - collecting group profile information for content;
  - sending messages to targeted network devices among other devices on the data network based on the user profile information for the network devices and the group profile information for the content, the messages instructing the targeted network devices on when and which content to download; and
  - downloading the content to the targeted network devices.

#### Information Disclosure Statement

Applicants' records indicate that Information Disclosure Statements (IDS) were filed on July <sup>4</sup>31, 2000, April <sup>5</sup>11, 2001, June <sup>6</sup>29, 2001, July <sup>7</sup>22, 2002, and November <sup>9</sup>5, 2002. However, the Patent Office has only acknowledged that the IDS filed July <sup>7</sup>22, 2002 was entered. Entry of the remaining IDS's is respectfully requested. For convenience of the Examiner, enclosed are copies of the PTO 1449 forms as previously filed and duplicate copies of non-U.S. patent publications cited therein.
